- 03 Client Benefits
- 04 Case Studies
- 05 The Saber Process

Saber Renewable Energy funds, builds and maintains renewable energy systems through Power Purchase Agreements, helping UK businesses take control of their energy use without upfront costs.

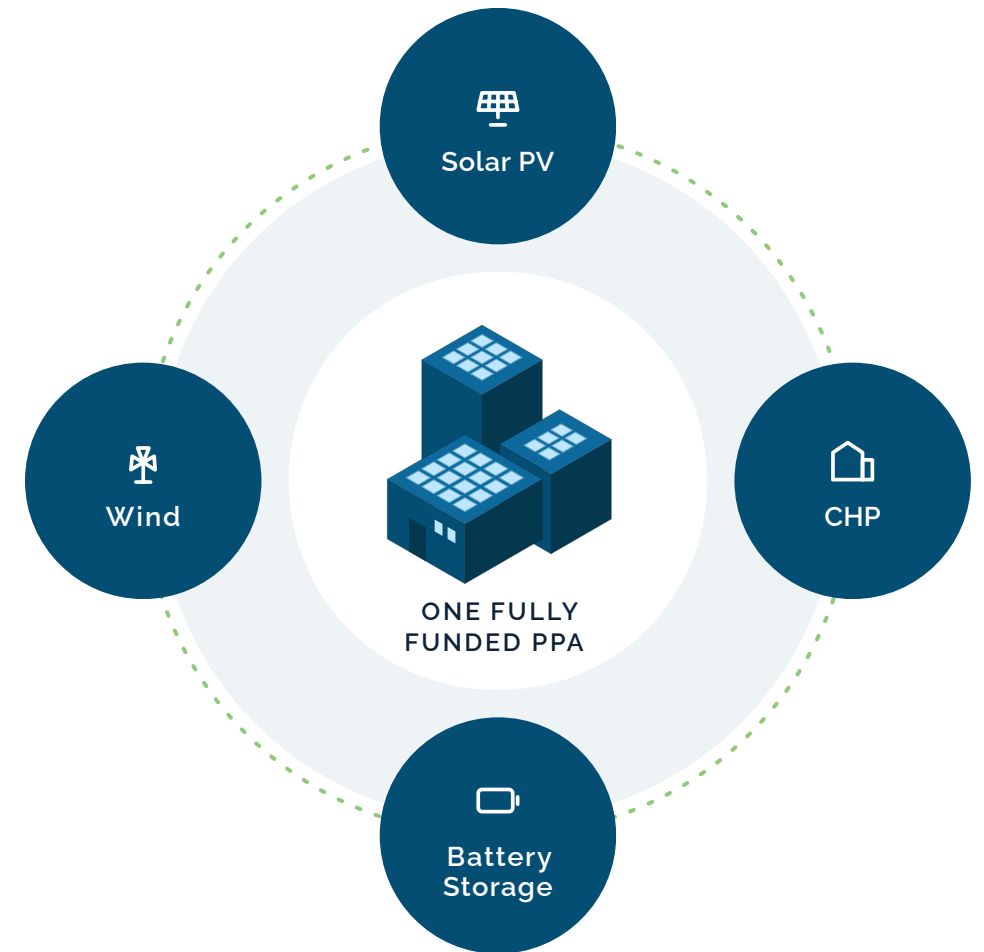

Our solutions span your entire estate, covering installation, commissioning and long-term maintenance. You simply buy clean electricity at rates well below the grid: a strategic, low-risk way to reduce carbon, cut costs and build long-term resilience.

WHAT A PPA DELIVERS

£ Lower utility costs

ESG improvement

Improved site resilience

WHY WE STAND OUT

More than a standard solar PPA.

We blend technologies, combine sites and include site remediation, all within one fully funded contract. The result is consistently higher savings and resilience than any single-technology solution.

Blended Technology

Solar PV, hydrogen-ready CHP, battery storage and more, under one funded contract. We design the right mix for your site profile and demand.

Multiple Sites, One Contract

One PPA can cover your entire property portfolio. No separate agreements per site or technology. One point of contact, one team.

Site Remediation Funding

Re-roofing, electrical upgrades or machinery replacement can be funded within the PPA, achieving more than energy savings alone.

Speed and Flexibility

Solutions sized from 50kW to multi-megawatt. We move quickly from data to detailed proposal, and manage the full project.

Zero capital cost. Maximum impact.

We fund and simplify your complete energy transformation, turning your sites into energy-generating assets.

01 Zero Capital Outlay

We fund the entire system, from design and development through to commissioning.

02 O&M Covered

All operational and maintenance costs are covered by Saber for the full PPA term.

03 Predictable Energy Pricing

Lock in energy prices long-term to shield your business from market volatility.

04 Ownership at End of Term

Asset transfer to you at the end of the term. Blending technologies helps shorten it.

05 Significant Cost Savings

Benefit immediately from energy priced well below current grid tariffs.

06 ESG & Carbon Goals

Reduce emissions while improving ESG performance and progress toward net zero.

07 Full Estate Solution

A resilient strategy across your entire estate. Generate 80%+ of energy on-site.

08 Additional Site Works

Future-proof sites by funding remediation within the PPA, keeping your capital.

Real results. Delivered by Saber.

**MANUFACTURING**

Baker & Baker

CHP

£687,025

saved in year one

A high-energy bakery site. Saber is developing a 949kW hydrogen-ready CHP solution, delivering 81% of the site's electricity.

**HOSPITALITY**

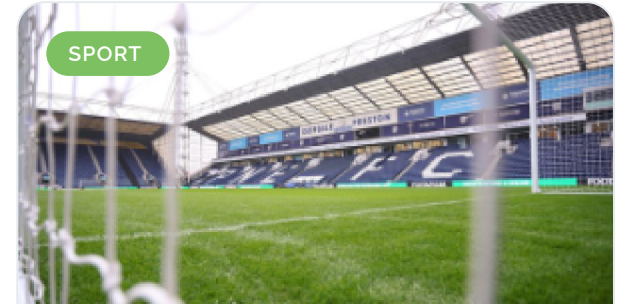

Burntwood Court Hotel

SOLAR PV + CHP

76%

of site electricity demand

A Yorkshire hotel resort with constant hot water and electricity demand. A combined Solar PV and CHP system creates £58K+ annual savings.

**SPORT**

Preston North End FC

SOLAR PV + CHP + RE-ROOFING

Funded

site remediation works

A Championship club with promotion aspirations. Phase 1 is delivered; Phase 2 incorporates re-roofing to future-proof the stadium.

THE SABER PROCESS

Efficient, effective, end-to-end.

We manage your complete path to energy independence with support from trusted national installation partners. Once a solution is chosen we move into an exclusivity agreement, so we can deploy resources to validate the project.
