

MARKETING PLAN

Preston North End

× *Saber Renewables*

What's in this plan

This is the working document for the PNE campaign.

It sets out the project, the messaging, the content, the channels, and the sequencing. Saber publishes; PNE approves anything that names the club or quotes Kevin Abbot.

Two phases, both ready to go. The work is done; the plan moves at the speed of content production.

CONTENTS

- Project overview
- Key messages
- Audiences
- Campaign structure
- Phase A · launch
- Phase B · voices
- Operating principles
- Timeline and success measures

What's installed, why it matters

A blended PPA, delivered.

Saber funded and coordinated solar PV and a hydrogen-ready CHP at Deepdale, under a single Power Purchase Agreement. Both systems are installed and operational. PNE pays a pre-determined energy price for the contract term, with no capital outlay.

Three commercial outcomes:

Match-day energy continuity. Long-term cost predictability. Measurable ESG progress, including ESOS reporting.

With the work complete, the campaign converts a delivered project into evidence other clubs can use.

Four points that thread through every piece of content

Each piece carries at least one of these. Together they make the through-line consistent across phases, channels, and audiences.

01 Resilience, not just renewables

From cheaper, greener power to match-day continuity. With CHP running alongside solar, diesel becomes a backup, not a crutch.

02 Cost control with no upfront cost

A funded PPA covers design, delivery, and maintenance. The club buys power at a pre-determined price and owns the system at the end of the term.

03 Real, reportable ESG progress

On-site generation supports emissions reduction and reporting obligations including ESOS. Tangible action that fans and finance teams both understand.

04 A platform to do more

The same agreement can wrap essential works like re-roofing or undersoil heating, and can extend across the wider estate if and when it's helpful.

Who the campaign reaches, and how

Three audiences carry the campaign. The messaging stays consistent across all three; the channels and emphasis shift.

EFL Green Team and club finance leads

Primary commercial target

Lessons learned, not a sales pitch. They've heard PV-only pitches; PNE's blended PPA route is the differentiator.

REACHED VIA

Private briefing · Case study · EFL deck

Wider football sector decision-makers

Secondary commercial target

Club FDs, operations directors, and stadium teams not yet in the EFL Green Team network. Reached through search and press.

REACHED VIA

Case study page · Saber LinkedIn · Earned media

Local press and PNE community

Reputation and amplification

Builds reputation, signals delivery, and provides citable third-party coverage that supports the commercial conversation.

REACHED VIA

Regional press · Trade press · PNE ad-hoc shares

Two phases, one destination

Each phase produces content. All content drives to one destination: the PNE case study page on saberrenewables.com.

What we publish now

Both systems are operational. This content is ready to go out. The case study page is built first, because every other piece links to it.

CONTENT PIECE		CHANNEL	PUBLISHED BY
01	PNE case study page (campaign hub)	Saber Website	Saber
02	Social post · rooftop PV image	Saber LinkedIn	Saber
03	Short video · solar + CHP installations	Saber LinkedIn	Saber
04	Graphic · funded model in a sentence	Saber LinkedIn	Saber
05	Joint press release (drafted, held)	Press release · held	Saber
06	EFL briefing deck (6-8 slides)	EFL · private session	Saber

Personal accounts, earned media and EFL activation

Once the launch content has had a week or two, we add the human voices, release the press piece alongside them, and run the EFL session.

CONTENT PIECE		CHANNEL	PUBLISHED BY
01	Source existing install footage and stills	Raw assets for all channels	Saber
02	Piece to camera · Kevin Abbot (30-45s)	Saber LinkedIn + case study page	Saber
03	Piece to camera · Saber engineer (30-45s)	Saber LinkedIn + case study page	Saber
04	Joint press release (published)	Press release · regional + trade	Saber
05	EFL finance officers' session (20 min)	EFL · private	Joint

Applied to every piece, every time

These keep the content credible and the partnership smooth. Both sides apply them.

Joint sign-off on content

Saber publishes everything, but PNE approves any piece that names the club, quotes Kevin Abbot, or shows their imagery before it goes out.

Be precise on project status

Solar PV and CHP are both installed and operational. We describe the project accurately and never overstate what's live or what's been tested.

Evidence over claims

Performance figures are described as modelled estimates until the system has metered data behind them. We don't publish numbers we can't stand behind.

Plain language over jargon

Written for finance directors and operations leads, not engineers. If a piece needs a glossary to follow, we rewrite it.

Measured cadence, no saturation

Timing is agreed in advance. Posts don't overlap. The story lands better paced out than crammed in.

How the phases pace out

Indicative pacing, not a fixed schedule. The bars show roughly when each phase happens.

Phase A · Launch

Social posts, EFL briefing deck, case study page, press release drafted and held.

Phase B · Voices

Pieces to camera, press release published, EFL finance officers' session.

Case study and EFL finance officers' session. Long shelf life assets.

What we're tracking

Targets for the first 90 days. Sized for EFL audience and commercial pipeline, not consumer reach.

REACH Audience		ENGAGEMENT Quality of attention		PIPELINE Commercial conversion	
1,000+	case study page views	>90s	median case study page dwell time	10-15	EFL briefing sessions booked
50k+	LinkedIn impressions across launch content	>2%	click-through rate from LinkedIn to case study	10+	qualified leads via “Model your site” CTA
3-5	regional and trade press pieces with link to case study	25+	EFL one-pager downloads	1-2	named opportunities entering Saber's sales pipeline

PRESTON NORTH END x SABER

Next steps

Approval on this plan, then Phase A launches. Saber publishes; PNE approves anything that names the club.

Things to pitch to Kevin when there's a natural moment

Saber publishes everything in the main plan. This is a separate menu of things PNE could post on their own channels if we ask. Treat them as low-pressure suggestions, not commitments. Drop one in when there's a quiet news week or a relevant matchday.

CONTENT PIECE	THEIR CHANNEL	HOW AND WHEN TO ASK
Repost Saber's launch posts	PNE Social	<i>Lowest-friction ask. When we publish the launch content, send Kevin a casual 'fancy a repost?' message.</i>
Website mini-feature (400-500 words)	PNE Website + Programme	<i>We draft it, Kevin approves and signs off, PNE publish. Best pitched in a quiet news week or alongside a matchday with a sustainability angle.</i>
Kevin Abbot Q&A	PNE Website	<i>30-minute conversation, we write it up, Kevin edits. Works well if he's already enthusiastic about the project.</i>
Supporters' update at a milestone	PNE Social + PNE Website	<i>One image plus three bullets. Save this for a tangible win: first year anniversary, first reported savings figure, or similar.</i>

This slide is hidden in the deck. PNE won't see it unless you choose to show it.
